

# Thinking Differently in Haemophilia:

## Considerations for the Multidisciplinary Team in Gene Therapy, Experience from Clinical Trials

Thursday, 4<sup>th</sup> February 2021, 18:00 – 19:00 CET

The importance of the multidisciplinary team in haemophilia has been well noted for a number of years. Moving forward, communication and coordination between teams and centres will become of paramount importance. Our faculty will provide insights into this evolution using their own experiences in gene therapy clinic trials, highlighting several areas of importance including shared decision making.

**Symposium Chair:**  
**Professor Wolfgang Miesbach**  
Goethe University Hospital, Germany

### Faculty

**Ms Sara Garcia Barcenilla**, Hospital Universitario La Paz, Spain

**Dr Sébastien Lobet**, Cliniques Universitaires Saint-Luc, Belgium

**Dr Gaby Golan**, Tel Aviv Medical University, Israel

### Agenda

18:00 **Welcome & Introduction**

18:05 **Experience from Gene Therapy Clinical Trials  
in Haemophilia: Perspectives from the MDT**

18:45 **Discussion and Q&A**

18:55 **Summary and Close**

This symposium has been initiated by
